Backend Engineer — Distributed Systems — AWS — Scalable Infrastructure

## TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, Golang, Rust, Javascript, Typescript, C++, Shell, Bash LaTeX
- **Backend:** Spring Boot, FastAPI, REST, gRPC, GraphQL, Microservices
- **Systems & Infra:** AWS (EKS, S3, EC2, Lambda, SQS, SNS, RDS), Docker, Kubernetes, RabbitMQ, Redis, Nginx, Prometheus, Grafana, Datadog
- **Databases & Streaming:** PostgreSQL, MongoDB, Kafka, Elasticsearch
- **DevOps:** Git, Jenkins, GitHub Actions, CI/CD

## EXPERIENCE

### Netradyne

Data Engineer

Bengaluru

Jul 2025 - Present

- Designed and built AWS-based monitoring system (FastAPI, MongoDB, CloudWatch) to track infrastructure metrics and costs, reducing cloud spend by **10–15%**.
- Reduced video reprocessing latency from **2 hours to 20 minutes (6x improvement)**, enabling reliable processing of **50K+ videos within 2 hours**.
- Built scalable distributed pipelines using **EKS, SQS, SNS, and S3**, improving system throughput and reliability for large-scale dataset generation.

### WinesecretHK

Founding Engineer

Apr 2024 - Jun 2025

- Designed and deployed scalable backend services (FastAPI, AWS RDS) for a recommendation platform serving real-time user queries.
- Built and optimized a retrieval-based system to improve recommendation quality beyond standard semantic search approaches.
- Integrated **Stripe payments** and POS webhooks to support seamless ordering and transaction workflows.
- Implemented multi-modal input pipelines and asynchronous processing to handle diverse user requests efficiently.

### BlackRock

Software Engineer (SDE-1)

Gurugram

Jul 2021 - Jun 2023

- Developed full-stack financial reporting platform (Spring Boot, Angular), reducing report setup time from **1.5 months to 2–3 days**.
- Standardized REST/GraphQL APIs across **50+ teams**, improving consistency and developer productivity.
- Mentored interns and contributed to onboarding, improving team velocity and knowledge sharing.

### BlackRock

Software Engineering Intern

Gurugram

Jan 2021 - Jul 2021

- Built CI/CD analytics dashboard (Angular, Golang) for tracking pipeline performance across teams.
- Improved backend test coverage to **85%+** and enabled **50% automation** through CI/CD pipelines.

## PROJECTS

### OCR Data Extraction System

- Built scalable document processing pipeline to extract structured data from PDFs using OCR and LLM-based parsing.
- Designed APIs to integrate extracted data into downstream systems for insurance workflows.
- [GitHub](#)

### LooksMaxing AI Platform

- Developed backend services for recommendation and personalization features with real-time inference support.
- [Live Project](#)

## EDUCATION

### M.Tech, Computer Science

CGPA: 8.90

IIT Hyderabad

2025

### B.Tech, Computer Science (Networks & Security)

CGPA: 8.90

VIT-AP University

2021
