

Degree	University/Institute	Year	CGPA/ Marks(%)
M.Tech Computer Science & Engineering / NIS - TA	IIT Hyderabad	2025	8.50
B.Tech Computer Science and Engineering with Specialization in Networks & Security	VIT-AP University, Amaravati, AP	2021	8.90
XII (CBSE)	DAV Public School, Palampur, Distt. Kangra, H.P. PIN-176061	2017	89.20%
X (CBSE)	DAV Public School, Palampur, Distt. Kangra, H.P. PIN-176061	2015	10.00

WORK EXPERIENCE

Tech Analyst (SDE-1) at BlackRock:

Jul, 2021 - Jun, 2023

- Developed a full-stack Self-Service Financial Information Reporting Tool (Angular, Spring Boot), reducing report setup time from 1.5 months to 2-3 days.
- Engineered Angular, Python, and Spring Boot applications/servers focusing on business implications, design, and architecture and achieved more than 85% test case coverage in all code implementations.
- Implemented CI/CD pipelines on Azure DevOps for five business critical servers and achieved performance and integration testing automation by 50%
- Spearheaded implementation and integration of REST and Graph APIs, enhancing standardization across 50+ business, development and quality assurance teams.
- Mentored 3 interns through BlackRock's Buddy program, facilitating their smooth onboarding and internship experiences

Tech Intern at BlackRock:

Jan, 2021 - Jul, 2021

- Successfully spearheaded a team of 4 to build an Angular and Golang Dashboard for developers to visualize pipeline failures as part of CI/CD integration with Azure DevOps.
- Oversaw the implementation of Angular-based frontend to display critical metrics like pipeline runs, failure statistics etc
- Built Golang-based backend with Azure APIs integration to fetch CI/CD data in real-time

PROJECTS

Thesis (On-Going): -

- Optimizing the core architecture of the HyperLedger Fabric blockchain in order to reduce the transaction failure rate, thereby making the blockchain more efficient.

Machine Learning and Deep Learning:

- Won IITH FoML Hackathon 2023 (1st place) with a voting-based ensemble model using Random Forest and Gradient Boosting
- Ranked 15th out of 100+ teams in IITH Deep Learning Hackathon 2024, implementing ResNet variants, DenseNet, ResNext, and Vision Transformer models
- Engineered complex deep learning architectures from scratch: CNN, RNN, ViT, Autoencoder, Variational Autoencoder
- Developed Poisson Regression model for meal time prediction, implementing Gradient Descent without external libraries
- Analyzed SVHN dataset using PCA, K-NN, and K-means Clustering for dimensionality reduction and prediction
- Demonstrated proficiency in backpropagation, MLP, ensemble methods, and comparative model analysis

TECHNICAL SKILLS

- Languages: JAVA(First Language), C++, PYTHON, TYPESCRIPT, JAVASCRIPT, GOLANG.
- Course Work: DSA, Computer Networks, Operating Systems, DBMS, OOPs, Machine Learning, Deep Learning, Distributed Computing.
- Frameworks: SpringBoot, Angular, Express (Node.js).
- Databases: MySQL, MongoDB, Sybase
- Other skills: Agile Software Development LifeCycle, Jira, Confluence, Integration and Regression Testing, Git, Feature Mapping, Handling support issues, Documentation
- Soft Skills: Leadership, Growth Mindset, Time Management, Communication Skills, Quick Learner, Adaptability.

ACHIEVEMENTS

- 4/5 star rating in BlackRock annual employee ratings for the 2021 and 2022 calendar year.
- Promotion nomination from Analyst to Associate role (SDE-2) for the 2024 BlackRock calendar year.
- First position in IITH ML course Hackathon.
- 15th position (out of 100+ teams) in the IITH Deep Learning course Hackathon.
- The first position(among 100+ students) in the Object Oriented Programming course.
- 450+ problems solved on Leetcode
