PROFILE SUMMARY

Software Engineer with an M.Tech in Computer Science from IIT Hyderabad and 3+ years of experience in building scalable production systems and applied AI. Skilled in architecting RAG-based LLM systems, optimizing distributed data pipelines, and developing high-performance financial platforms. Proven track record of reducing cloud costs by 15% and optimizing system latency by 6x.

EDUCATION

M.Tech, Computer Science

IIT Hyderabad

CGPA: 8.90

B.Tech, CSE (Sec & Networks)

VIT-AP University

CGPA: 8.90

EXPERIENCE

Netradyne

Data Engineer (ML Systems)

Bengaluru

Jul 2025 - Present

- Designed and implemented AWS Monitoring System (Python, MongoDB, FastAPI) for machine metrics and costs (**10–15% cost reduction**).
- Optimized Video Reprocessing System (EKS, SQS, SNS, ASGs), reducing latency from **2 hours to 20 mins** for 50K+ video dataset creation.
- Built scalable infrastructure for large-scale video feature engineering.

TECHNICAL SKILLS

- Languages:** Java, Python, SQL, C++, Golang, Rust, Javascript, Shell/Bash.
- AI/ML:** LLMs (RAG, Fine-tuning, PEFT, LoRA/QLoRA), Transformers, LangChain, LangGraph, VAE/Anomaly Detection, Reinforcement Learning.
- Backend:** Spring Boot, FastAPI, REST, gRPC, GraphQL, Node.js, Microservices.
- Data & Infra:** AWS (EKS, Lambda, SQS, SNS, S3, RDS), Docker, Kubernetes, Kafka, Redis.
- Databases:** PostgreSQL, MongoDB, ChromaDB, Elasticsearch.
- Tools:** Git, Jenkins, GitHub Actions, CI/CD, Grafana, Datadog, Prometheus.

WinesecretHK

Founding Member (AI Architect)

Remote

Apr 2024 - Jun 2025

- Built **RAG AI Pairing System** using Python, AWS RDS, and ChromaDB for flavour-profile matching (not just semantic search).
- Developed **HyDE-inspired RAG algorithm** for wine pairing (Patent submitted).
- Implemented multi-modal agentic workflows using LangChain and LangGraph for complex user interactions.
- Integrated Stripe payments and POS webhooks for ordering.

BlackRock

Tech Analyst (SDE-1)

Gurugram

Jul 2021 - Jun 2023

- Developed full-stack Financial Information Reporting Tool (Spring Boot, Angular), reducing setup from **1.5 months to 2-3 days**.
- Standardized REST/GraphQL workflows across **50+ teams**.
- Mentored 3 interns and facilitated team onboarding.

PROJECTS

Fraud Detection (VAE)

Anomaly detection

[GitHub](#)

- Built VAE model for credit card fraud detection (91%+ accuracy).

Car Insurance OCR

Structured Data Extraction

POC

- Developed Python system to extract structured data from insurance PDFs using OCR and OpenAI LLMs for upper layer APIs.

LooksMaxing AI Platform

AI personalization

[Link](#)

- Built recommendation system using Gemini & prompt engineering for virtual try-on.

Synthetic Data (VAE)

- Generated datasets using VAE latent space exploration.

RESEARCH & PUBLICATIONS

HyperLedger Fabric Optimization

M.Tech Thesis — IIT Hyderabad

[arXiv](#)

- Optimized architecture to reduce failure rates. Presented at Indosys 2025.

HACKATHONS & ACHIEVEMENTS

- 1st Place (IITH FoML):** Ensemble model (Random Forest/GBDT).
- 15th/100+ (IITH DL):** Advanced DL using ResNet, ViT.
- Deep Learning Architectures:** Implemented CNN, RNN, Transformers from scratch (NumPy).
